Dear Mr Graham Shapiro,

On behalf of the Mental Health Foundation, I would like to thank The Graham Shapiro Foundation for their generous support in the 2021. Together, we have helped to improve people's mental health. Please find enclosed an overview of our latest life-changing work to prevent mental health problems.

This year, around 16.8 million in the UK will experience a mental health problem

The UK is at a breaking point. Coronavirus (COVID-19) and the cost of living have pushed millions of people into a mental health crisis. Health inequalities are exacerbating this. Resulting in young people, refugees, ethnic minorities and those in deprived areas having the highest risk of mental health problems. **By working together, we can change this so all people and communities can thrive.**

Our mission is to help people in the UK to survive, recover from and prevent mental health problems. We do this by embedding ourselves into at-risk communities to deliver preventative interventions. Alongside this, we increase mental health knowledge, tackle stigma, advance research and campaign for change.

The Mental Health Foundation would like to ask The Graham Shapiro Foundation to consider supporting us once again, to help prevent mental health problems so all people and communities can thrive. Thank you for considering our update. If any further information would be helpful, please do let me know.

Yours sincerely,

Sarita Aujla
